Perform Stone Gloss is a unique film-forming product for daily cleaning and surface treatment- and maintenance of hard floors except wooden floors. Perform Stone Gloss forms, upon drying, a water- and dirt repellent wax film with self-gloss. Perform Stone Gloss cleans and maintains the floor without building up the surface layer and leaves no water marks. Perform Stone Gloss is easy to use even when wet / damp mopping. Repeated use will prevent the occurrence of heel marks and repairs worn footpaths without giving building up structure that acrylic polish does. The floor will be effectively clean and Perform Stone Gloss builds a durable and dirt / water repellent protective film at the same time. The floors will be very easy to clean. To achieve maximum brilliance and a very easy surface to clean use high speed with the appropriate pad. Perform Stone Gloss is a member of the Perform Floor-Recond System.

Nullification = pore cleansing and removal of old wax residue and dirt - use Perform Deep Stone Cleaner, Perform Hulk Floor Cleaner or Perform Polish Remover or clean steam (120 ° C).
