200 litre Item code: 02-721E  
2 x 200 litres per pallet (400 litres)

1000 litre IBC Item code: 02-722E

Perform Stone Soap Special - The Original is a floor cleaner concentrate for manual- or mechanical cleaning and maintenance of all water resistant floors. Perform Stone Soap Special -The Original is both a floor cleaner and an impregnator for stone floors. Perform Stone Soap Special - The Original reacts with the lime in the stone and produces a thin layer of protective soap.

Perform Stone Soap Special - The Original is for protection, cleaning and daily maintenance of all kinds of stone (marble, limestone, slate, granite, concrete and terrazzo). Perform Stone Soap Special - The Original can also be successfully used on unglazed floor of artificial stone such as tiles, floor tiles, terracotta, porcelain gres, oiled wooden floors and untreated-or waxed linoleum floors.

Perform Stone Soap Special – The Original cleans and protects in one step, leaving no water marks. The surface becomes highly water- and dirt repellent, which also makes cleaning easier and extends the life of the surface. The surface is not closed and can breathe.

Perform Stone Soap Special -The Original forms an extremely thin layer (monomolecular) of water repellent lime soap. This prevents water and dirt from penetrating the surface micropores. The surface may have a slightly darker look after treatment, that is because it is refatened and protected. Always do a test area to verify the effectiveness and results before an entire surface is treated for the first time.

Result - a clean, easy to clean stone surface with a natural patina / shine. The product is easy to use, flexible, and cost effective.

Note - If you notice that you have an oily film on the surface after impregnation or cleaning, there is a surplus of soap. This can be swabbed off with warm water. Protect from freezing. Perform Stone Soap Special The Original is a member of the Perform Floor-Recond System.

Basic impregnation: 1-2 litres to 10 litres of water  
Manual cleaning: 0.5-1.0 dl to 10 litres of water  
Damp mopping: 0.5-1.0 dl to 10 litres of water  
Auto Scrubber: 0.5-1.0 dl to 10 litres of water  
Diamond polishing/grinding: 0.5 dl to 10 litres of water

pH approx. 8.5 in concentrate.
