

5 litre pack Item code: 02-118E
3 x 5 litres per carton
48 x 3 x 5 litres per pallet (720 litres)

Perform Tile Cleaner is used after installation of porcelain gres and tiles but also on heavily soiled surfaces. Perform Tile Cleaner removes scrap residue or cement film remaining on the surfaces after installation. Unglazed plates should always be cleaned with Perform Tile Cleaner after installation. Remember to always pre-water the joints before cleaning. Never use Perform Tile Cleaner in the machine, always apply directly on the surface with a mop or a sponge.

How to use: Let Perform Tile Cleaner work for a few minutes and then scrub with a Grout brush for joints (Item code: 126-ST11) or Doodlebug brush (Item code: 126-ST12) for flat surfaces. Rinse thoroughly with water and repeat the cleaning if necessary. Perform Tile Cleaner dissolves grease, lime and light rust stains.

After cleaning and drying you can impregnate the cleaned surface and joints with Perform 17.40. Daily cleaning after installation cleaning can be done on glazed and impregnated surfaces with Perform Hulk Floor Cleaner and on unglazed and unpolished surfaces use Perform Stone Soap Special.

pH about 1 in concentrate. Store frost-free.

Dosage: 3 liters to 10 liters of lukewarm water.

Note: Some tiles can not withstand cleaning with acidic cleaners.
Always check with the tile supplier before using any acidic cleaner.
